Material, Semiconductor, Component and In-Circuit Measurement Solutions

Selection Guide
Achieve Success with The Industry Standard for Impedance Measurements

Hewlett Packard, Agilent Technologies, and Keysight Technologies, Inc. have contributed innovations and product excellence in impedance analysis for over half a century. Whether your application is in R&D, production, quality assurance, or incoming inspection, we take pride in contributing to your success. We strive to deliver complete solutions to meet your needs, from impedance analyzers to a wide variety of test accessories. Achieve success with Keysight’s impedance measurement solutions. Keysight offers:

**Superior product performance:** Keysight products provide the best in class accuracy and the repeatability with the fast measurement speed. Three types of impedance measurement solutions as shown in Table 1 are available meeting the various measurement needs.

**Complete solution:** Covering frequencies from 5 Hz to 3 GHz along with the wide variety of test accessories, Keysight’s impedance product line offers you the widest selection of equipment for your application. This selection guide gives an overview of all the products and accessories you can choose from.

**Appropriate frequency range for your application:** Keysight products provide the best performance in the industry with frequency options to meet your needs at an affordable price. You can select the most appropriate frequency range for your application. Flexible frequency upgrade options are also available. You can choose just what you require today with the least amount of investment and upgrade later as needs arise.

**Technical expertise:** Keysight has decades of experience providing impedance measurement solutions. Years of experience and continuing technical innovations go into the design and manufacturing of each Keysight LCR meter and impedance analyzer. Keysight also has a list of technical publication to assist you in many different applications (see page 15 for full listing.)

**Advanced measurement techniques for a wide range of applications**

Figure 1 is a comparison of different measurement techniques used in Keysight’s LCR meters and impedance analyzers. As you can see, each technique has special measurement advantages:

- Auto-balancing bridge offers widest impedance measurement range with typical frequency range of 20 Hz to 110 MHz. This technique is best for low-frequency, general-purpose testing.

</tbody>
</table>
- I-V technique covers from 40 Hz to 110 MHz with a more focused impedance measurement range. I-V technique also allows probing for in-circuit testing.

- RF I-V, an enhancement of the I-V technique, offers some of the high-frequency benefit of network analysis while retaining some of the impedance measurement range of the I-V technique. Designed for accuracy and high-frequency performance, the RF I-V technique is excellent for RF component analysis, especially for small inductance and capacitance values.

- In addition, Keysight’s network analyzer offers an impedance measurement solution using the combination of three measurement techniques (reflection, series-thru, and shunt-thru) based on the S-parameter and gain-phase measurements.

How to use this selection guide

Table 2 is a summary of all of Keysight’s impedance products. It is designed to assist you in better comparing Keysight’s wide range of instrumentation and in choosing possible solutions for your applications, depending on your requirements in the following areas:

- Test frequency range
- Device type or application type
- Accuracy requirement (measurement technique)
- Any other special needs

If you find several possible solutions for your application, go to the corresponding pages to find more details about each product.

1. Basic Z accuracies are best-case values and vary depending on measurement conditions. See product data sheet for detail.
2. Capacitance measurement only.
3. Z range shows the 10% accuracy range.
4. Feature code: A: Built-in equivalent circuit analysis B: Frequency sweep with color LCD display C: Spot frequency with color LCD display D: Spot frequency with LCD display
Impedance Analyzers

Only Keysight impedance analyzers provide unparalleled accuracy from mOhm to Mohm, from 5 Hz to 3 GHz. You can select the appropriate frequency range for your application.

- Frequency, DC bias, and AC voltage/current sweep capability lets you customize where and how test data will be taken.

- Built-in equivalent-circuit analysis computes a multi-element circuit model of the device under test.

- Advanced calibration and compensation methods reduce measurement errors.

- Accessories for permittivity & permeability of materials, high-temperature characterization, various passive components, and impedance probe for grounded measurements available

E4990A impedance analyzer

- Five frequency options; 20 Hz to 10/20/30/50/120 MHz, upgradable
- ±0.08% (typical ±0.045%) basic impedance measurement accuracy
- 25 mΩ to 40 MΩ wide impedance measurement range (10% measurement accuracy range)
- Built-in DC bias range: 0 V to ±40 V, 0 A to ±100 mA
- 4-channel & 4-trace on 10.4 inch color LCD with touch screen
- Data analysis function: Equivalent circuit analysis, limit line test
- In-circuit or grounded measurement with the 42941A impedance probe (Option 120 only)
- 7-mm test fixtures combined with 42942A Terminal Adapter (Option 120 only)
- Measurement speed: 3 ms~ / point (option 120), 30 ms~ / point (option 10/20/30/50)

E4991B impedance analyzer

- Three frequency options: 1 MHz to 500 M/1 G/3 GHz, upgradable
- ±0.65% basic accuracy and 120 mΩ to 52 kΩ impedance range (10% measurement accuracy range)
- Measurement parameters: |Z|, |Y|, δ, R, X, G, B, L, C, D, Q, |Γ|, Γx, Γy, θ, Vac, Iac, Vdc 1, Idc 1
- Built-in DC bias (Option 001): 0 V to ±40 V, 0 A to ±100 mA
- 4-channel & 4-trace on 10.4 inch color LCD with touch screen
- Data analysis function: Equivalent circuit analysis, limit line test
- Dielectric/magnetic material measurement (Option 002): |ε|, ε’,
  ε'', tanδ(ε), |μ|, μ’, μ'', tanδ(μ)
- Temperature characteristics measurement (Option 007) and reliable on -wafer measurement (Option 010) capabilities

1 Option 001 is required.
Network Analyzer

E5061B-3L5 LF-RF network analyzer

The E5061B-3L5 LF-RF network analyzer with the option 005 impedance analysis function offers the network and impedance analysis capabilities in a single instrument. The E5061B-3L5/005 is a versatile and cost-effective solution suitable for general R&D use where various kinds of electronic components and circuits need to be evaluated:

- S-parameter test port (5 Hz to 3 GHz) and gain-phase test port (5 Hz to 30 MHz, 1 MΩ/50 Ω inputs)
- The E5061B-005 supports reflection, series-thru, and shunt-thru methods using the S-parameter test port or gain-phase test port. These methods are suitable for low-to-middle, middle-to-high, and very low milliohm impedance ranges, respectively.¹
- Keysight’s 7 mm type and 4-terminal pair type component test fixtures can be used in the reflection method (at the S-parameter test port) and the series-thru method (at the gain-phase test port).
- Impedance measurement parameters: |Z|, |Y|, θ, R, X, G, C, L, D, Q
- Built-in DC voltage bias source (0 to ±40 V, max ±100 mA)

¹ For details about each method’s impedance measurement range, refer to “E5061B-3L5 LF-RF Network Analyzer with Option 005 Impedance Analysis Function, Data Sheet” (5990-7033EN).
LCR Meters

The Keysight LCR meters provide the best combination of accuracy, speed, and versatility at an affordable price for both R&D and production applications.

- Wide frequency range from 20 Hz to 3 GHz
- Frequency list sweep for continuous testing at multiple frequency points
- Unparalleled measurement accuracy at both high and low impedance range
- With the widest variety of accessories, great for testing of leaded components, surface-mount components, semiconductors, and materials
- Fast measurement speed with superior measurement repeatability
- Handler interface with BIN sorting function for easy test automation in production environment

**E4982A LCR meter**

- 1 MHz to 3 GHz with 100 kHz resolution
- High speed measurement: selectable from 0.9 ms (Mode 1), 2.1 ms (Mode 2), and 3.7 ms (Mode 3)
- 0.8% basic accuracy
- RF I-V technique provides a wide impedance range (0.14 Ω to 4.8 kΩ)
- Highly stable measurement of low-inductance and excellent Q accuracy for meeting chip inductor test requirements
- Handler interface suitable for production testing
- Measurement parameter \(|Z|, |Y|, \theta, R, X, G, B, L, C, D, Q, Rdc, Idc, Vdc,\) in user-definable combinations of parameters (up to 4 parameters)
- Versatile PC connectivity – GPIB, LAN, USB

**4285A precision LCR meter**

- 75 kHz to 30 MHz
- 0.1% basic accuracy
- List sweep measurements
- Option 001 adds ±40 V dc bias voltage
- Measurement parameters: \(|Z|, |Y|, \theta, R, X, G, B, L, C, D, Q\)
E4980A precision LCR meter

- 20 Hz to 2 MHz with 4-digit resolution
- 0.05% basic accuracy with superior measurement repeatability at low and high impedance
- Measurement time (at 1MHz): 5.6 ms (SHORT), 88 ms (MED), 220 ms (LONG)
- Option E4980A-001 adds ±20 Vrms/±100 mArms test signal, ±40 V/±100 mA internal dc bias, 2nd DC source, and Vdc/Idc measurement
- Option 201 and 301 add handler interface and scanner interface respectively
- Versatile PC connectivity, LAN, USB (memory/USBTMC), GPIB

E4980AL precision LCR meter

- 20 Hz to 300 kHz/500 kHz/1 MHz with 4-digit resolution
- 0.05% basic accuracy with superior measurement repeatability at low and high impedance
- Measurement time (at 1MHz): 12 ms (SHORT), 118 ms (MED), 343 ms (LONG)
- Versatile PC connectivity, LAN, USB (memory/USBTMC), GPIB

1 Option E4980A-001 is required.
E4981A 120 Hz/1 kHz/1 MHz capacitance meter

- 120 Hz, 1 kHz and 1 MHz test frequencies
- High speed measurement: 2.3 ms (1 MHz), 3.0 ms (1 kHz), 11.0 ms (120 Hz)
- Basic accuracy C: 0.07%, D: 0.0005
- Handler and scanner interfaces suitable for production testing
- Measurement parameters: C, D, Q, ESR, G
- SLC feature provides constant test voltage for high-value capacitor measurements.
Test Fixtures and Accessories (Four-Terminal-Pair)

Basic test fixtures

16034E SMD/chip test fixture
Frequency: ≤ 40 MHz
Maximum dc bias: ±42 V peak max

16034G small SMD/chip test fixture
Frequency: ≤ 120 MHz
Maximum dc bias: ±42 V peak max

16034H SMD/chip test fixture
Frequency: ≤ 120 MHz
Maximum dc bias: ±42 V peak max
Suitable for array-type devices

16044A SMD Kelvin contact test fixture
Frequency: ≤ 10 MHz
Maximum dc bias: ±42 V peak max

16334A SMD/chip tweezers test fixture
Frequency: ≤ 15 MHz
Maximum dc bias: ±42 V peak max

16047A axial & radial test fixture
Frequency: A: ≤ 13 MHz (Kelvin contact)
Maximum dc bias: A: ±42 V peak max

16047E test fixture
Frequency: ≤ 120 MHz
Maximum dc bias: ±42 V peak max

16089A/B/C/D clip leads
Clip type: A/B/C: Kelvin
D: Alligator
Frequency: 5 Hz to 100 kHz
Cable length: A/B/C/D: 0.94 m
E: 1.3 m
Maximum dc bias: ±42 V peak max
Test Fixtures and Accessories (Four-Terminal-Pair)

External DC bias fixtures

16065A axial and radial test fixture with safety cover

- Frequency: 50 Hz to 2 MHz
- Maximum external dc bias: ±200 V
- Blocking capacitor of 5.6 µF is connected in series with the Hc terminal

16065C external bias adapter

- Frequency: 100 Hz to 1 MHz
- Maximum external dc bias: ±40 V
- Blocking capacitor of 50 µF is connected in series with the Hc terminal

Test leads

16048A/D/E BNC test leads

- Frequency: A: ≤ 30 MHz, D: ≤ 30 MHz, E: ≤ 2 MHz
- Cable length: A: 0.94 m, D: 1.89 m, E: 3.8 m
- Maximum dc bias: ±42 V peak max

16048G/H BNC test leads

- Frequency: ≤ 120 MHz
- Cable length: G: 1 m, H: 2 m
- Maximum dc bias: ±42 V peak max
- Use with only 4294A/E4990A

Terminal adapters

42942A four-terminal-pair to 7 mm terminal adapter

- Frequency: ≤ 120 MHz
- Maximum dc bias: ±42 V peak max
- Use with only 4294A/E4990A
Test Fixtures and Accessories (Four-Terminal-Pair)

Material measurements

- 16451B dielectric test fixture
- Measurement parameters:
  - Capacitance (C), dissipation factor (D), and dielectric constant (ε\text{'}, ε\text{''})
  - Material-under-test size:
    - Thickness: ≤ 10 mm
    - Diameter: 10 to 56 mm
  - Frequency: ≤ 30 MHz

- 16452A liquid test fixture
- Measurement parameter:
  - Capacitance (C), dielectric constant (ε\text{'}, ε\text{''})
  - Liquid sample
  - Quantity: ≤ 6.8 ml
  - Frequency: 20 Hz to 30 MHz

Others

- 42941A impedance probe kit
- Frequency: ≤ 120 MHz
- Maximum dc bias: ±42 V peak max
- Probe cable length: 1.5 m
- Use with only 4294A/E4990A

Test Fixtures and Accessories (7-mm Terminal)

RF SMD/chip components

- 16196A/B/C/D SMD test fixture
- Coaxial fixture for parallel electrode SMDs.
- Frequency: dc to 3 GHz
- Maximum dc bias: ±42 V peak max
- Applicable SMD size:
  - 16196A: 1.6 mm x 0.8 mm
  - 16196B: 1.0 mm x 0.5 mm
  - 16196C: 0.6 mm x 0.3 mm
  - 16196D: 0.4 mm x 0.2 mm

- 16197A bottom-electrode SMD test fixture
- Frequency: dc to 3 GHz
- Maximum dc bias: ±42 V peak max

- 16092A axial, radial, and SMD test fixture
- Frequency: ≤ 500 MHz
- Maximum dc bias: ±42 V peak max
16192A parallel-electrode SMD test fixture
Frequency: dc to 2 GHz
Maximum dc bias: ±42 V peak max

16194A high temperature component test fixture
Frequency: dc to 2 GHz
Maximum dc bias: ±42 V peak max
Operating temperature: -55 °C to +200 °C

16200B external DC bias adapter
Frequency: 1 MHz to 1 GHz
Maximum external dc bias: Up to 5 A, ±40 V

Material measurements

16453A dielectric test fixture
Frequency: 1 MHz to 1 GHz
Sample size (smooth sheets only):
thickness: 0.3 mm to 3 mm
diameter: ≥ 15 mm

16454A magnetic test fixtures
Frequency: 1 kHz to 1 GHz
Sample size (toroids only):
height: ≤ 8.5 mm
inner diameter: ≥ 3.1 mm
outer diameter: ≤ 20 mm

Test Fixtures and Accessories (E5061B)

16201A N-type to 7 mm terminal adapter
Frequency: ≤ 3 GHz
Maximum dc bias: ±40 V
Use with only E5061B
Simplify and Improve Your Measurements with Keysight’s Test Accessories

Selecting a test fixture is as important as selecting the right instrument. Keysight offers a wide range of accessories for axial, radial, and SMD/Chip devices. In addition, a variety of test leads are available to simplify remote testing and systems applications. External test fixtures with safety covers are also available.

You will improve your measurement results with the proper test fixture.

- more reliable and repeatable measurement
- higher through-put
- fewer handling errors
- tighter test limits
- better measurement accuracy

Note: Refer to the accessory descriptions for frequency and operational limits.
1. 3.5-mm (M) to 7-mm adapter is required
2. 42942A is required.
3. Compatible when used in conjunction with 16201A.
4. E4991B-002 is required.
Helping You Make Better Measurements

Keysight's application knowledge can help you make better measurements.

Impedance Measurement Handbook (P/N 5950-3000) is a comprehensive guide to impedance measurements. The handbook covers from basics to applications and you can learn valuable measurement techniques to support your test challenges.

1. Impedance Measurement Basics
2. Impedance Measurement Instruments
3. Fixturing and Cabling
4. Measurement Error and Compensation
5. Impedance Measurement Applications and Enhancements

Complementary Products and Accessories

To help you find a complete solution, we have listed the following companies that make complementary products or specialized accessories for Keysight's impedance measurement products. Please contact each company directly if you are interested in its products. (Keysight does not make any special endorsement of these companies' products; this list is for reference only.)

AdvancedTCA® Extensions for Instrumentation and Test (AXIe) is an open standard that extends the AdvancedTCA for general purpose and semiconductor test. Keysight is a founding member of the AXIe consortium. ATCA®, AdvancedTCA®, and the ATCA logo are registered US trademarks of the PCI Industrial Computer Manufacturers Group.

LAN eXtensions for Instruments puts the power of Ethernet and the Web inside your test systems. Keysight is a founding member of the LXI consortium.

PCI eXtensions for Instrumentation (PXI) modular instrumentation delivers a rugged, PC-based high-performance measurement and automation system.

Keysight’s commitment to superior product quality and lower total cost of ownership. The only test and measurement company with three-year warranty standard on all instruments, worldwide.

Up to five years of protection and no budgetary surprises to ensure your instruments are operating to specification so you can rely on accurate measurements.

Get the best of both worlds: Keysight’s measurement expertise and product breadth, combined with channel partner convenience.
